Bureau of Vital Statistics

This report is the final tabulation of statistical data for the year 1957. The annual report of the Bureau of Vital Statistics is compiled for research use in the study of birth, death, marriage, and divorce statistics. No attempt has been made to analyze the health factors which might be reflected by the statistics, for it is impossible to know which reports would be of most interest to the user.

If further statistical information is desired, one may obtain it by contacting the Bureau of Vital Statistics. The bureau also has more detailed breakdowns on many items which, because of their volume, have not been included in this report but may be made available upon request.

April, 1959
